**Sizes:-**

**4mm – 1500mm**

**Materials:-**

Metal & Plastic

We believe and practice as much as possible the environment, with all aspects of the business a policy which minimises the destruction of the environment and we recycle, where possible.

**Electronic Communications**

- 1) Electronic Communications: - We prefer electronic communications for internal and external communications, which includes quotations, enquiries, invoices, statements, purchases and like acknowledgements presented in the same way in accordance to normal modern business practices and demands. Some exceptions occur in instances and especially where there are interruptions to internet and power service.
- 2) Paper and Cardboard:- Everyvalve tries re-use cardboard boxes and not use paper unnecessarily. However this is not always possible because of the state of the cardboard, the fact that named suppliers adhesive tape is plastered absolutely everywhere (We ask suppliers not to do this) and that packing is some way contaminated. We use a local recycling company's services regularly. With paper we have a shredder which useful for packing or an industrial mobile shredder for any large quantity of paper, should that be necessary.
- 3) Water – Everyvalve water supply is metered.
- 4) Premises – Everyvalve Factory premises is maintained in good order & nearly 50% double glazed.
- 5) Heating – Everyvalve Factory has a relatively modern gas blower heater.
- 6) Despatches- Everyvalve needs to pack well and adequately goods, which is under constant review. Everything is breakable and we try to use reliable shippers. Everything is breakable and we make every effort to avoid such instances... Internal protection for fragile items is essential and use what is normally necessary. Client should sign as unchecked to shipper on receipt of goods please. Our Delivery Note is attached to outside of packing with two strips only, of named tape with fragile notice, is uniformly applied. Pallets would be used for heavy goods.
- 7) Suppliers Goods: - Everyvalve asks suppliers to pack goods securely for good arrival and if possible in reusable packaging, that is not plastered all over with named tape.

The End
